

FleetLink user features

individual calls

one to one radio communications.

group calls

gives you the option of making a single call simultaneously to a number of others.

incoming caller ID

lets you know who is calling you.

status calls

pre-programmed text messaging using 2 digit codes representing the individual messages.

crisis calls*

guaranteed rapid connection across the Teamtalk network for emergency situations.

fleet emergency calls*

one button emergency calls to a number common to all users in your fleet.

PABX connections *

linking your PABX system directly to our mobile radio network allows you to make extremely low cost 'telephone to radio calls'.

telephone calls *

make telephone calls from your radio to any telephone in the country.

data transfer *

send data in a huge variety of forms from all types of device to a PC or data terminal.

24 hour 0800 fault hotline

ring us anytime night or day if you are having problems.

* subject to additional charges. See pricelist for information.
